

Synchronization test cases 5.7

Per:

<https://jira.magnolia-cms.com/browse/MGNLSYNC-42>

<https://jira.magnolia-cms.com/browse/SUPPORT-11255>

Constraints

- Magnolia 5.7
- Publishing 1.0.5
- Synchronisation module 1.8
- All synchronisations done with standard synchronisation command (info.magnolia.synchronization.commands.SynchronizationCommand)
- ***Synchronisation REST module not installed!***

Test case 1:

1. Duplicate /travel -> /travel0
2. Disable receivers and publish (synch will skip unpublished nodes)
3. Launch recursive synch of /travel0 with command synchronization-synchronize
 1. Succeeded

Author log:

2020-05-29 19:52:21,928 DEBUG

[ia.synchronization.commands.SynchronizationCommand](#): Synchronization executed successfully for node /travel0.

2020-05-29 19:52:22,481 DEBUG

[ia.synchronization.commands.SynchronizationCommand](#): Synchronization executed successfully for node /travel0/tour-type.

2020-05-29 19:52:22,837 DEBUG

[ia.synchronization.commands.SynchronizationCommand](#): Synchronization executed successfully for node /travel0/destination.

Test case 2:

1. Create page hierarchy kablooi->kablooi1->kablooi2->...->kablooi10
2. Disable receivers and publish (synch will skip unpublished nodes)
3. Launch recursive synch of /travel0 with command synchronization-synchronize
 1. Succeeded
